Product Description

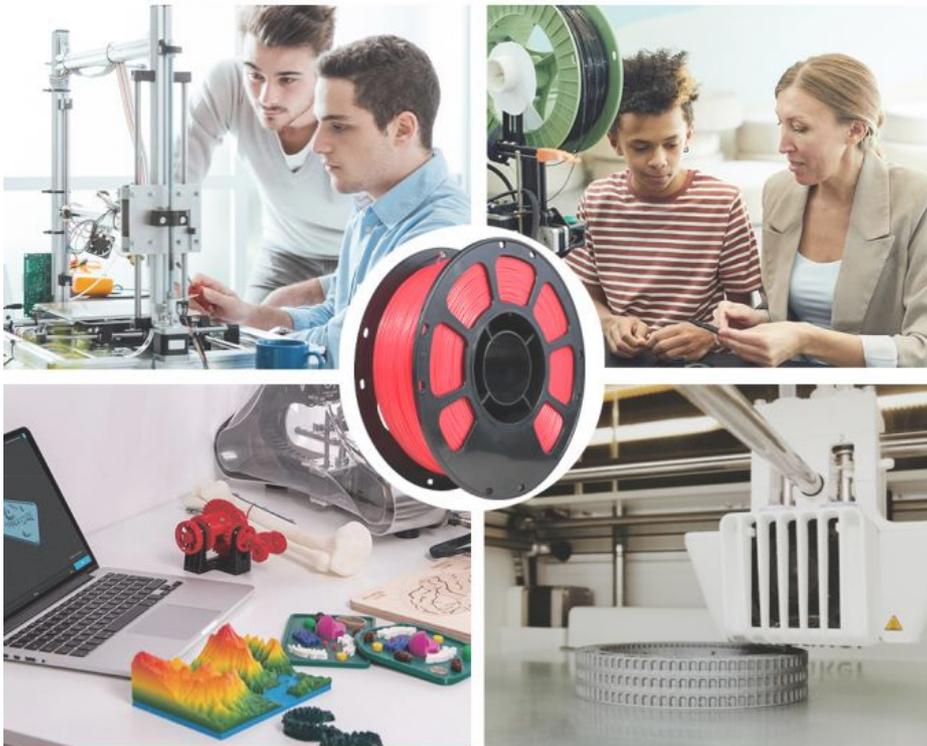

Iboss Strong Resilience Temperature Color Change Red To White 3D Printing Filament PLA +1.75mm

Discover the Iboss Strong Resilience Temperature Color Change 3D Printing Filament, a game - changer for your 3D printing projects. This 1.75mm PLA+ filament offers a unique feature: it changes color from red to white as the temperature varies, adding an element of surprise and interactivity to your creations.

Made with high - quality PLA+ material, it combines the advantages of traditional PLA with enhanced toughness. This results in 3D printed objects that are not only visually appealing but also durable and resistant to breakage. The filament's strong resilience allows it to withstand normal handling and usage without easily deforming or cracking.

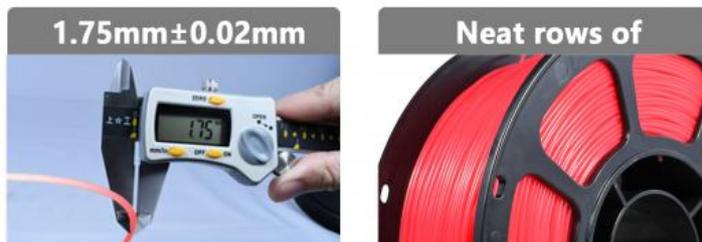

With a standard 1.75mm diameter, it is compatible with most common 3D printers on the market. Whether you're working on artistic designs, functional prototypes, or educational models, this filament is up to the task. Unleash your creativity and bring your ideas to life with the Iboss temperature - changing 3D printing filament.
