Product Description

3D Printed Filament High Strength 1.75mmSilk Vine Yellow PLA+ filamentnt 1000g

1.Exceptional Strength for Durable Prints

Our 1.75mm Silk Vine Yellow PLA+ filament offers remarkable strength. Compared to standard PLA, this upgraded material has enhanced toughness, making it perfect for printing functional parts that need to withstand stress. Whether you're creating mechanical prototypes or long - lasting decorative items, its high - strength properties ensure your prints maintain integrity over time.

2.Stunning Aesthetic Appeal

The unique Silk Vine Yellow color adds a touch of elegance to any 3D - printed project. The silk - like finish imparts a smooth, shiny texture, creating eye - catching prints with a pearlescent sheen. This makes it an ideal choice for crafting jewelry, artistic displays, or cosplay accessories, where visual allure is crucial.

3.Precise and Reliable Printing

With a weight of 1000g per spool, you get ample material for extensive projects. The 1.75mm diameter has a tight tolerance, ensuring consistent feeding through your 3D printer. It's compatible with most FDM 3D printers. Recommended print temperatures range from 200 - 230°C, allowing for smooth extrusion and high - quality layer adhesion, resulting in detailed and flawless prints.
