Product Description

iboss 1000g PLA+ Filament Dear Green 1.75mm FDM Forming Technology 3d Printing Filament

Unleash your 3D printing potential with iboss' 1000g PLA+ Filament in charming Dear Green. Engineered for FDM forming technology, this 1.75mm filament is a game-changer.

Made from premium PLA+ material, it offers enhanced strength and toughness compared to standard PLA. The filament is 100% wound neatly, ensuring smooth feeding during printing. With a dimensional accuracy of $\pm 0.02\text{mm}$, it guarantees stable prints and an outstanding surface finish.

It is incredibly easy to use. Melting well within the recommended 190 - 230 °C range, it feeds constantly without clogging the nozzle or extruder. Its low shrinkage rate reduces warping, and it has high adhesion for better layer bonding.

Vacuum-sealed with a desiccant bag, it stays dry and dust-free. Compatible with most FDM 3D printers, it's perfect for hobbyists and pros to bring their vivid 3D creations to life.
