Product Description

Iboss1.75mm PLA+ Rainbow Filament 1kg Morandi Rainbow 3D Printing Filament

Iboss 1.75mm PLA+ Rainbow Filament, 1kg spool in soft Morandi rainbow hues, is ideal for 3D printing. With precise 1.75mm diameter ($\pm 0.02\text{mm}$), it ensures smooth feeding and consistent prints.

PLA+ material boosts strength vs. standard PLA, resisting warping for durable, detailed models. The Morandi color gradient offers subtle, elegant transitions—perfect for art, decor, or prototypes. Compatible with most FDM printers, it's easy to use for beginners and pros alike, delivering vibrant, high-quality results every time.
